NEXT WORK PARTY IS August 20, 2017

Provisional members; this is a good chance to get in your required volunteer hours. **Followed by December 9th, 2017**

The Presidents' Corner

Scholarship Awards

The annual Scholarship awards deadline is August 16, 2017. Members are encouraged to have college bound family members apply for this award. Requirements and applications are on the website.

www.escondidofishandgame.com

FYI: (Reprint)

I was asked a question by a member that got me thinking maybe he wasn't the only one who didn't know. The question was, basically, "How does a member access the Board of Directors"? He was trying to find out how a member could give input on ideas, suggestions, etc. He thought that maybe some (possibly most) members are somehow intimidated by BOD members and are afraid to approach them. So, let me try to clarify:

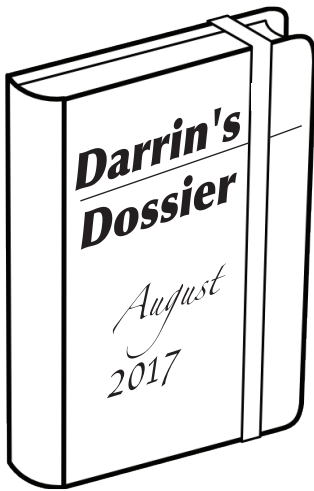

First and foremost is to attend BOD meetings on the first Thursday of each month. This is where the business of this association is conducted. If you have an idea or suggestion or just a concern to present to the BOD, call, email or write a note to the Secretary asking to be put on the meeting agenda.

Secondly, attend the general member meeting(s) on the second Thursday of each month. During the section known as new business you may present your thoughts to the President and/or Secretary, and they will then put that on the agenda for the next BOD meeting. {The business of the Association is not conducted at general meetings with the exception of elections and general member voting issues, ie: by laws, etc.}

Third and, I think, extremely important is that the Board of Directors are just folks, like you, and elected to serve the majority of the membership. Please do not feel they are unapproachable. I hope this helps.

PLAY SAFE, STAY SAFE

Neil Pisk

How to Make Changes Happen

I grew up in a family with six of us under one roof (four children and two parents). As expected, when there are many people in a confined space, conflicts and disagreements happened. This usually resulted in at least one of us going to

the authorities (parents) to petition for changes. Because my parents were wise, we were informed that when we complained that we had a choice: Volunteer to assist in a solution or stop complaining. This resulted in creative solutions where we all had participation as well as 'skin-in-the-game'.

This method has also served me well in my professional life. I will not go to my boss with a complaint about a procedure or policy unless I have a recommendation for a better method as well as willingness to help implement the solution. If we apply the same method to EF&GA we can train ourselves to look for solutions and improvements rather than looking for problems and finding reasons to complain. After spending a few years working with the Board of Directors, I have seen this method be very effective as long as we are all willing to listen to alternative solutions and appreciate those who come forward with new ideas. Usually, the rough ideas get distilled and adjusted into a working solution to the problem. Ronald Reagan kept a plaque on his desk that read "There is no limit to what a man can do or where he can go if he doesn't mind who gets the credit".

Make Time to Attend a General Meeting

Bring a friend to the next General Meeting and one or both of you could win a few bucks. At the last General Meeting John Brennan won the \$25 door prize. Had he attended the meeting, Greg Robinson would have won the \$500 Attendance Prize. The next General Meeting is 8/10/2017. If you don't show up, you can't win.

Identify This Man and WIN (8/10/2017)

If you can properly identify this smoldering young man about town, come to the August General Meeting and be ready. After the meeting a drawing will be held and the first contestant to correctly identify this man will win a box of 22LR ammunition and bragging rights. At the June General Meeting the loud and proud Marine from the July newsletter was identified as Patrick Russ by Jeffrey Keith.

Donor List (7/13/2017)

Thanks to all who donated to the raffle table at the last General Meeting - Michael McKinney, Craig Rogers, Wayne Brunner, Alan Chmielewski, Ray "Guns and Roses" Bucholz, Pamela A. Tucker, Jim Fratis, Brian Rasmussen, Eric Elsam, Gerry Graf, Richard Sorcinelli, L.T. Reynolds, Jack Bryson, Joyce and Frank Alessio, Al Anzelone, Dave Babbs, Ed Migdal

Left the Range

Chuck De Montmorency passed away. He was a life member and became a member in 1975. Please keep him and his family in your thoughts and prayers.

Work Party (8/20/2017)

Come and join us for a fun and rewarding day of range clean-up and improvements. We will be preparing for the anticipated fire season as well as the usual cleaning and maintenance tasks. After the festivities there will be a great lunch with a drawing for prizes. All are welcome to pitch in - young, old, members, guests,.. we will find something for you to do to help the cause. Some people appreciate a good workout and others do it to enjoy participating in a large job getting done quickly as many hands make light work. Some people bring their kids to burn off excess energy and teach them about being part of something bigger than themselves. Whatever your reason, come on out and join us to get it done.

Coaches Course (10/15/2017)

We will be conducting a Coaches Course where we will teach you how to coach. We are always looking for more coaches to help out at the Jr. events (Jr. Rifle, Pistol, and Archery). Come on out and learn something new or be reminded of something you forgot. These classes can also be used by Women on Target coaches as well. Please email Ren Everett at everettju1@cox.net to let me know you will be there.

Member Donations

When we all receive our membership renewal forms, we fill out the line items that we believe are due along with optional items like NRA membership renewals, etc. There is also an option to make a donation to the Association. The following members graciously used that line item to donate and I want to thank them all publicly here and now: Peter Swenson, Ronald Mottino, Lee Curtis, Michael Trinkle, Ron Brownell, Jeffrey Boersma, Jerald Strauss, Winslow Garnier, David Taylor, Jangh Singh, Timothy Costanzo, Robert Jensen, Martin Conrad, Joe & Jake Luciano, Jon Sherwood, Edward Komzelman, Karl Homa, Robert Cruz

NRA Home Defense Class (9/8/2017)

Home intrusions and robberies have been making the news daily. This one-day class addresses range exercises that emphasize potential home intruder encounters, movement to cover and use of cover/concealment, awareness, avoidance, and dealing with single to multiple threats, and a classroom session that expands upon the concepts you experience on the range and more. It will be held on Friday, September 8 and includes the NRA certificate and handbook. This is the last time this class is scheduled at the EFGA in 2017. This is an intermediate class: Students (adults 21+ who must have prior basic to intermediate experience/training in the safe use of, and legally be able to use handguns) will shoot their own handguns and ammunition. This class is listed on the NRA training website under Self Defense, NRA Basic Personal Protection In The Home Course at: <http://tinyurl.com/WM-NRAPPITH-09-08-2017> To reserve your spot and for more information, email or call Bill Magdych: cienegabill@gmail.com 858-356-4019. Prior registration is required. Open to the public (please let me know if you are an EFGA member to receive your discount).

NRA Concealed Carry Class (9/22/2017-9/23/2017)

Please note that this two-day class will be held in September on Friday (22th) and Saturday (23rd). This is the last time this class is scheduled at the EFGA in 2017 and it is the NRA's most advanced class. Students

RANGEMASTER SOUND OFF

By: Tim Geiser – CRSO • crsoTim@aol.com

I have mentioned it before, but shooters should be aware that during this time of the year we conduct a safety walk through for all new members on the third Thursday of the month. The walk begins about 1700 hours (5:00pm for anyone not familiar with military time). We try to keep the interruption as brief as possible, but a cease fire will be called as the group approaches each range. There could be as many as three groups on any given day. The point is that there will be interruptions in your shooting. I am apologizing in advance. These tours are important for our new members and I certainly appreciate your cooperation.

I must admit that I am a bit of a stickler for hygiene especially on the range where lead is present. When the youngsters are involved it is more important than ever since they can be quite susceptible to some of the problems lead can cause. While I am an avid shooter I am also a trained molecular biologist who can say with confidence that heavy metal poisoning is nothing to laugh at. Before leaving the range the problem can be easily eliminated by washing your hands with COLD water and soap. Use cold water to close the skin pores. If any of you old guys feel the need to laugh at my caution, feel free to do so, but ignorance is not always bliss.

Safety on the range is nearly always on my mind and this time of year does nothing to ameliorate the situation. Fire is just one more way to interrupt my sleep at night because knowing that we are never more than one good spark away from a major problem. The range itself is probably one of the safest places to be in the event of a fire. Having said that, let us be sure that none of us is responsible for starting any fires. Every member needs to be aware of where the fire hoses are located. Familiarize yourself with location, operation and how to use them. If you have any questions, please check with me, any RSO or any Board member. You will find that we are all happy to assist.

There seems to be a bit of confusion regarding the use of "Zombie" targets so let me clear it up in my always clear and concise manner! **YES you can use them! However, there are some limitations.** The target cannot look like me or anyone else such as a known political figure. They must also conform to the same size limitations the same as any other target. Additionally, target size for the short pistol range is increased to 12" x 12" rather than the posted 10 x 10. The slightly larger target should never have been a major problem, but it seems to have caused some controversy at times. All other short range rules apply.

I actually reached the ripe old age of 74 before deciding to grow a beard while on vacation this year. I have been told that I looked most distinguished with a beard although you might be surprised to hear that my wife did not agree! Is anyone surprised to know that I no longer look as distinguished?

STAY SAFE, SHOOT STRAIGHT

Dossier Continued from Page 5

(adults 21+ who must have prior intermediate or greater experience/training in the safe use of, and legally be able to use handguns) will shoot their own handguns and ammunition. This class includes a full day on the range with exercises that provide increasing challenges through advanced drills that demonstrate principles of concealed carry, the draw, defensive shooting, movement, single, multiple and moving threats, use of barriers, and awareness of situations that may be encountered. The classroom session includes review of the course textbook, flashlight techniques with laser trainers, and other important information to compliment and reinforce the range sessions and the essentials of concealed carry. This class includes both the Basic and Advanced NRA Certificates upon successful completion. This class is listed on the NRA training website under Self Defense, NRA Basics of Personal Protection Outside the Home Course at:

<http://tinyurl.com/WM-NRAPPOTH-09-22-2017> To reserve your spot and for more information, email or call Bill Magdych: cienegabill@gmail.com 858-356-4019. Prior registration is required. Open to the public (please let me know if you are an EFGA member to receive your discount).

New Shoot Chair Needed

By Kevin Miller

After serving as the Shoot chairman for National Match Course Rifle Match for over a decade, I am planning to relinquish my position after October, 2017. This is one of the oldest organized matches run at the Escondido Fish and Game Association, having been run continuously for over 40 years. It has been my privilege to serve as the Shoot Chairman for this match, but with my impending retirement and a plan to move out of California, I will no longer have the time to run the match. I need someone to step up and take over the responsibilities of running the match. If anyone is interested in doing so, please call me and we can discuss the job requirements. If no one is interested in doing so, this match will go away after October 2017.

How to place a classified ad in the newsletter

Please help to keep the classified section easy to read and well organized. There is no cost as long as you are an EF&GA member in good standing. Classified ads run for ONE newsletter (one month). If you want to repeat an ad for another month (with price adjustments, etc...) simply re-submit the ad request via e-mail.

Please submit requests for classified ads via email to newsletter@escondidofishandgame.com and be sure to double-check for spelling and grammar errors.

It may sound obvious but requests for classifieds are frequently received with not enough information to be useful to a reader. **There are 5 main components of a classified ad:**

Category – Most classifieds fall into one of 3 categories, 'For Sale', 'Wanted', or 'Lost & Found'.

Subject/Title – This will appear in bold in the advertisement. This should be short (2 or 3 words) and concise.

Description – This is the body of the advertisement and can be a few sentences but not more than a paragraph. Abbreviations appear cryptic and are not recommended unless they are well known acronyms.

Price – A specific dollar amount as well as qualifiers give the reader important information. For example, "\$600 or Best Offer, Buyer pays DROS, Will consider trades"

Contact Info – This should be a name AND a phone number (including area code) and/or an e-mail address.

DEADLINES!!

Items For the Next Newsletter are Due

Friday, August 18th

Any and all requests for items to appear in the monthly bulletin should be routed through

Darrin Eaton - 760-630-8339

JUNIOR CORNER

By Patrick Russ

RULES TO LIVE BY

1. **Treat** every firearm as if it were loaded
2. **Never** point your firearm at anything you don't intend to shoot
3. **Keep** your finger straight and off the trigger until you intend to fire
4. **Know** your target and the surroundings

If you hadn't noticed, summer is here. The hot weather has awakened all the warm weather creatures around the range. This includes rattle snakes and black widow spiders.

Though uncommon, rattlesnake bites do occur. So, have a plan in place for responding to any situation.

Carry a cell phone, hike or shoot with a friend who can assist in an emergency. Do not step or put your hands where you cannot see. Step ON logs and rocks, never over them, and be especially careful when climbing rocks or gathering firewood. Check out the area under and around benches and tables before taking a seat. In addition to the rattles snakes, we need to be on the look out for black widow spiders. Black widow spider bites can be dangerous, especially to young children and elderly people. Hospital treatment is sometimes needed, but fatal bites are rare. A black widow spider bite often is painful right away. There will be tiny puncture wounds at the bite site, with some local swelling. Wash the area well with soap and water. If there is no pain, or if the pain is mild, no special treatment is needed. After a bad bite, severe pain and muscle cramps can start in a couple of hours. Muscle cramps start in the area of the bite (often a hand or foot) and move towards the center of the body.

Because black widow spiders hide, you might not see them even if they're close by. Protect yourself in areas where they might live.

- Shake out your gardening gloves before putting them on. Shake out boots or shoes that you've stored in garages, basements, or sheds before putting them on.
- Always wear gloves when moving wood, reaching into wood piles, handling mulch, grabbing empty flower pots, etc.

BLACK POWDER NEWS

By Garth Warner

Lost and Found: Shortly before the 4th of July someone shooting BP on the 100 yard range left some equipment on one of the tables. I have checked all the regular BP guys known to me and no one has claimed the items. If YOU left BP gear on the range during the time identified above please contact me. (Contact info on the contact page of the EF&GA website), If you can identify the items, I will arrange to get them back to you. If no one claims the items, they will be donated to the Jr Muzzle Loading program.

June Contest: No secrets, it was a hot one. Fourteen brave souls showed up to shoot rifle and eight showed up to shoot Pistol/Revolver. Our July and August contests promise to be equally warm. Please remember to hydrate during our summer shoots. Paramedics love to respond to hot sweaty heat cases, but they might draw the line at patients smelling like Sulfur and Brimstone.

Jr Muzzle Loading Program: Our second ever BP Jr program took place on July 9th. Again it was HOT so attendance was lighter than expected. We had seven juniors show up with their parents. The juniors got to shoot 13 round balls at a 25yd paper target with the best 10 rounds counted for score. The juniors got to shoot both a cap lock and a flintlock during the shoot. As a bonus, both the juniors and their parents had a chance to shoot steel silhouette targets as well. Lots of smiles seen all around. The next Jr Muzzle Loading date has not yet been set, so watch the newsletter for the next announcement.

Practical BP Accuracy

I planned to write quite a bit about this subject, but the deeper I get into the discussion, the more involved it gets. To start off the subject let me ask you, how accurate is your Black Powder rifle shooting round balls at 100 yds? We are talking about shooting from the bench accuracy now, not offhand. Is your 100 yd group larger or smaller than 6" in diameter? I will make a bold statement here as say "almost" any currently available Black Powder round ball rifle is capable of shooting a 6" group at 100 yds from the bench with the following

qualifiers..... Qualifier one is you need decent sights that you can

see over, or through, consistently. Most reproduction BP rifles have fixed or adjustable sights that are pretty poor. Some have wide blade front sights, some have narrow brass front sights, and some have bead front sights.

There is no universal answer to this problem because everybody has eyes are different. If you are vision challenged, don't be afraid to look at aftermarket sights that might better fit your unique vision problems.

It's really not that hard to buy and fit aftermarket sights. Most rifles have a pretty universal 3/8" dovetail for front and rear sights. After a quick mail order package and a little time with a cheap jewelers file, you could have a new, (and more accurate), "Look" down your barrel.

Qualifier number two is this: You have to be willing to test different powder loads, ball sizes, and patch thicknesses. Here is where the work really begins. For the purposes of testing, the rifle I will use is an old Thompson Center Hawkin rifle fitted with a replacement 1-70 twist Green Mountain round ball barrel. This rifle has been fitted with a 40 year old Thompson Center hood and globe front sight, and a Thompson Center vernier aperture rear sight.

More on this next month.

Tales From the Chronograph - Black Powder Edition vol. 1 Yes, I have a chronograph, and I am not afraid to use it. This will be a series where we can draw totally erroneous conclusions, from statically questionable data, to support whatever harebrained preconceived notion that we might have. Unless otherwise identified, all the published results are from a 32", 1-70 twist, 50 caliber, Green Mountain barrel using lead round balls.

Thank you,

Garth Warner

Test #1

.495 Lead Round Balls, Pillow Ticking .20 patch, 2F powder

60 grns 1423 fps

65 grns 1437 fps

70 grns 1481 fps

75 grns 1511 fps

80 grns 1577 fps

85 grns 1654 fps

90 grns 1695 fps

95 grns 1738 fps

Test #2

.495 Lead Round Balls. Pillow Ticking .22 patch, 3f powder

60 grns 1545 fps

65 grns 1631 fps

70 grns 1654 fps

Test #3

.495 Lead Round Balls, Pillow Ticking .24 patch, 3f powder

60 grns 1593 fps

65 grns 1648 fps

70 grns 1712 fps

75 grns 1750 fps

OK. That was 45 balls, and the better part of a pound of powder to find out the following....

3f powder has more energy than 2f powder, Increasing patch thickness theoretically forms a better seal, which also increases velocity.

Testing showed that as velocity increased, the Point Of Impact went up, and shifted to the left. That is, there was a diagonal line of impact points from the center of the target that climbed to the top left corner of the target as velocity increased.

Why do we care? Well round ball ballistics suck is the simple answer.

Supersonic RB behavior is predictable to a point, but, when a RB drops subsonic weird things happen. In the interest of accuracy we would like to keep the round ball supersonic all the way to the target.

Realistically that is not always possible for ranges beyond 100 yards.

More on that next time. To sign off I will leave you with a URL link to a round ball ballistic program. Not terribly accurate, but there is not the interest in refining the program like there is for modern projectiles....

NRA Basic Shotgun Class (9/24/2017)

This class covers firearm safety and basic skills of Shotgunning. It is also designed to train the student on the proper skills required to hit a moving target. The NRA Certified Shotgun Course teaches stance, gun ready position, swing to target, trigger pull and follow through. The class consists of classroom exercises and hands-on instruction including live fire exercise through which students will learn and demonstrate safe and proper shotgun shooting procedures and technique. Hands on range time will include techniques required for shooting moving targets-(Trap). Upon successful class completion students will receive the NRA Basic Practical Rocker and an NRA Basic Shotgun Certificate. Classes are limited to 10 Students.

To reserve your spot call or email:
